## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a composition comprising a crude extract containing at least one annonaceous acetogenin, wherein the crude extract is prepared from at least one species in the group consisting of the annonaceous genera Asimina, Annona, Goniiothalamus, Uvaria, Disepalum, Xylophia, and Rollinia, classified in class 424, subclass 775-776, 725+.
  - II. Claims 7-9, drawn to a method for extracting a crude extract of invention of group I, classified in class 549, subclass 403.
  - III. Claims 10-12, drawn to a method for decreasing tumor antigen levels by administering an effective amount of the composition of group I, classified in class 514, subclass 783.
  - IV. Claims 13-14, drawn to a method for determining a patients tolerance to a crude extract including the steps as recited in claim 13, classified in class 514, subclass 783.
2. Inventions I-IV are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. Since the product is not allowable, restriction is proper between said method of making and method of using. The product claim will be examined along with the elected

Art Unit: 1618

invention (MPEP § 806.05(i)). For instance, US20030144348 teaches Annonaceous acetogenins obtained by an extraction of *A. muricana* seed but not from twigs of *Asimina triloba*. Furthermore, the product(i.e. Annonaceous acetogenins) can be used in treatment of materially different process of use(e.g. pesticidal activity, see US 6991818)

3. Inventions III and IV are directed to related to a method for decreasing tumor antigen levels and a patient tolerance to a crude extract. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, as evidenced by applicant's own claims, the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect and thus, the invention are independent to each other.

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, as well as because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

#### **Rejoining practice**

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain

Art Unit: 1618

dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
